

# MIKE THORN

## TECHNICAL SUPPORT ENGINEER

m@x38.dev 📠 330-428-0466 🌐 in/mikethorn

🌐 Ohio, USA (GMT-5) 📶 Remote/Hybrid ⌚ Permanent or Contract

### SUMMARY

---

Versatile, highly empathetic veteran support leader, with 6 years of user-facing IT and SaaS experience, and 2 years of experience managing complex, high-stakes operations projects. Demonstrated track record of action bias, executive ownership, best-in-class communication, and cross-departmental collaboration.

### KEY EXPERIENCE

---

#### Tech Support Lead | TimeKeeping Systems | Ohio | April 2024 – Present | Onsite

- Achieved +58% above team average in ticket KPIs, earning 4.7/5-star CSAT across 46% of closed tickets.
- Became go-to customer champion for internal teams and high-value customer contacts.
- Led initiatives to discover and reform legacy processes, reducing team labor by 60%+ when complete.
- Developed several internal utility apps to reduce repetitive tasks and eliminate human error.
- Built web integrations with legacy data sources to reduce manual data entry.
- Served as product manager for new customer-facing web portal, from user story to acceptance criteria. When complete, this portal will eliminate 15+% of total ticket workload, across multiple teams.
- Implemented deep data analytics to better predict team resource needs and capabilities and proactively prepare for increased workload and work scope as company grows.

### ADDITIONAL EXPERIENCE

---

#### IT Support Tech II | Renovo Solutions | Ohio | June 2020 - June 2022 | Onsite

- Set new standard for exceptional role KPI's, while userbase grew 40% over 2 years.
- Solo-supported 380+ field engineers and executives via email and phone, actively triaging and resolving to avg. 30 requests per day. Developed new inventory management processes, added support for many new third-party software applications, and expanded Apple device fleet.

- Saved 10% spend on annual replacement PC cost by initiating in-house repair capabilities.
- Embedded deeply with the QA and Dev throughout SDLC, achieving strong cross-departmental communication and rapid solutions to production bugs and user training issues.
- Learned complex, bespoke endpoint management system in weeks, proving exceptional technical competency, and rapid ability to learn new technology and programming languages.
- Identified high-friction scripted process; deployed complete overhaul within 3 months, which reduced cycle time by ~65% and interaction needed by 80%.
