

MIKE THORN

TECHNICAL SUPPORT LEAD / PRODUCT MANAGER

m@x38.dev 📠 330-428-0466 🌐 in/mikethorn

🌐 Ohio, USA (GMT-5) 📶 Remote/Hybrid ⌚ Permanent or Contract

SUMMARY

Support-centered systems generalist with 6+ years of SaaS and IT experience, including ownership of high-stakes operational and product work. Known for strong user empathy and end-to-end ownership: translating customer pain into durable solutions that reduce friction, error, and support load at scale. I excel in ambiguous, escalation-heavy, cross-functional environments, shaping product, process, and tooling.

GENERALIST IMPACT (SUPPORT-LED)

- Turned frontline user pain into tools, automation, and product changes that removed entire ticket groups.
- Replaced fragile, manual workflows with systems designed for scale, accuracy, and low cognitive load.
- Aligned Support, Product, and Engineering efforts to unblock customers and teams.
- Consistently reduced human error and operational drag through thoughtful process and system design.

KEY EXPERIENCE

Tech Support Lead | TimeKeeping Systems | Ohio | April 2024 – Present | Onsite

Primary scope is technical support leadership, with formal Product Manager ownership.

- Delivered +58% above team average in ticket KPIs, earning 4.7/5-star CSAT across 46% of closed tickets, while owning escalations for complex, high-impact customer issues.
- Became trusted customer advocate for internal teams and high-value customer contacts, translating real-world usage friction into actionable fixes.
- Identified legacy, high-friction workflows across support and operations; designed and shipped internal utility apps reducing team labor 60%+ when complete.
- Built web integrations against legacy data sources to reduce manual data entry and error rates.
- Acted as product owner for a new customer-facing web portal: user discovery, requirements, user stories, acceptance criteria, and internal rollout.
 - » When complete, portal will eliminate 15%+ of total ticket volume across multiple teams.
- Implemented analytics to forecast workload, staffing needs, and support risk as the company scaled.

ENVIRONMENT: SQL, POWERSHELL, PYTHON, AZURE, ZENDESK, MDM, OFFICE 365, GOOGLE SHEETS, AI+ML

IT Support Tech II | Renovo Solutions | Ohio | June 2020 - June 2022 | Onsite

- Solo-supported 380+ field engineers and executives, handling ~30 requests per day across phone and email, while maintaining strong KPI performance during 40% userbase growth.
- Embedded deeply with the QA and Dev throughout the SDLC, enabling rapid resolution of production bugs and user training gaps.
- Identified brittle, high-touch scripted process; owned end-to-end redesign and deployment within 3 months, reducing cycle time by ~65% and enabling 60-minute hardware provisioning instead of 48 hours.
- Initiated in-house hardware repair capability, reducing annual PC replacement spend by 10%.
- Rapidly learned and operated a complex bespoke endpoint management system, demonstrating strong adaptability and technical depth.

ENVIRONMENT: GOOGLE WORKSPACE, GAM, JAMF, CHEF, SENTRY, RUBY, LINUX

IT Support Tech | Logivision Technologies | Ohio | May 2017 - June 2020 | Onsite

- Served as trusted client advocate, resolving dissatisfaction, improving retention, and reducing long-term support friction.
- Cut issue research time by ~50% and reduced documentation sprawl 66%, by consolidating knowledge systems and defining best practices.
- Supported full network stack: endpoint, hardware, firewalls, DNS/DHCP, virtualization, and identity.
- Authored comprehensive troubleshooting and best-practices documentation for internal teams.
- Collaborated daily with vendors to achieve timely, accurate resolutions for client issues.

ENVIRONMENT: ACTIVE DIRECTORY, HYPER-V, VMWARE, SOPHOS, OFFICE 365, AUTOTASK, UNIFI / UBIQUITI

PERSONAL PROJECTS – PROBLEM-DRIVEN SYSTEMS

Independent projects focused on identifying concrete pain points and shipping usable solutions. Hands-on work with 3rd-party APIs, AI-assisted tooling, UI/UX, source control, tech writing, and documentation.

- [x38.dev](#) – Personal portfolio(React, CSS, Vercel)
- [heimeyra.app](#) – Aircraft proximity alerting for audio work (TypeScript, React, CSS, REST API)
- [reaperdiff.app](#) – Audio project timeline change detection
- [looplest.app](#) – Spirograph simulator(Typescript, React, CSS)
- [8bitweather.app](#) – Kid-friendly weather forecasting
- [check-id3](#) – MP3 metadata verification (Python, Powershell, Regex)
- [Local speech-to-text pipeline](#) – Fast offline transcription (Powershell, whisper.cpp)

ADDITIONAL EXPERIENCE

Audio Producer | Freelance | USA | October 2019 – Present | Remote

- Produced 28 titles / 500+ hours of narration, reaching 8M+ listeners.
- Built custom production tooling and dashboards to reduce error, improve scheduling accuracy, and surface anomalies.
- Designed a client-centric production pipeline emphasizing clarity, expectation-setting, and quality, earning consistent 5-star ratings.

ENVIRONMENT: GITHUB, TYPESCRIPT, CSS, REACT, APPS SCRIPT

Producer (Assistant Director) | Freelance | USA | April 2015 - May 2017

- Managed teams of up to 20 on complex, multi-day productions, with minute-level scheduling precision.
- Led migration from paper workflows to SaaS tooling, improving visibility, revision control, and approvals.
- Owned risk analysis, contingency planning, and cross-functional coordination to deliver 100% on-time, on-budget execution.
